
ENVIRONMENTAL POLICY

STRATEGY AND GOALS

Yris Solutions DOO is a provider of services and manufacturer in electronic industry. In delivering its services and manufacturing its products, Yris Solutions is committed to pollution prevention, conservation and environmental improvement. The business processes that take place in Yris Solutions DOO are in accordance with environmental standards and in accordance with the principles of sustainable development.

SCOPE AND PRINCIPLES

Environmental Management System (EMS) in Yris Solutions is implemented and maintained in accordance with the requirements of the standard ISO 14001:2015. Encouraged by continuous improvement of business processes, we also improve the environmental management system, set objectives as a basis for evaluating the environmental performance. With proactive approach and cooperation with stakeholders, we are committed to:

- preserving biodiversity and a healthy environment
- sustainable resource management and product life cycle monitoring;
- performing business processes in accordance with European regulations, national legal requirements and other environmental requirements;
- efficient use of energy and reduction of greenhouse gas emissions;
- cooperation and participation in the activities of control and reduction of negative impacts on the environment;
- raising awareness and continuous education of employees and external associates
- motivating business partners to comply with this policy.

RESPONSIBILITIES

Top management of Yris Solution is committed to improving the environment and sustainable business, improving communication with stakeholders, and supporting Corporate Social Responsibility (CSR) actions.

Yris Solutions DOO business policy in the field of environmental protection is available on the internal portal to all employees of the company, and it is given for insight to direct and indirect users of our services, regulatory bodies, local community and other interested parties.
